SUMMARY

Design-focused Frontend Developer with strong foundations in HTML5, CSS3, and modern JavaScript, specializing in building responsive, pixel-perfect user interfaces using React and Next.js. Skilled in translating UI/UX designs from Figma into high-quality, reusable components with consistent design systems. Experienced in Flexbox, Grid, animations, and cross-browser compatibility, with a strong focus on visual hierarchy, typography, spacing, and overall UI polish. Proficient in integrating REST APIs, handling data fetching, loading states, and error management. Demonstrates attention to accessibility (a11y) best practices, performance optimization, and delivering intuitive, user-centric experiences.

EDUCATION

Master of Computer Applications

Calicut University

Aug 2025 – Present

Bachelor of Computer Applications

CAS Mavelikkara

Aug 2022 – Mar 2025

Percentage: 62.9

PROJECTS

Smart Farming E-Commerce Platform

Full-Stack Development

PHP, MongoDB,

- Developed a full-stack e-commerce platform enabling transactions between farmers and buyers with role-based access (admin, farmer, user)
- Designed RESTful APIs for product management, order processing, and authentication, supporting 500+ simulated transactions

Smart Attendance System using Face Recognition

Machine Learning

Python, CNN

- Developed a face recognition-based attendance system using Python and machine learning techniques
- Achieved 90% recognition accuracy using trained facial datasets
- Reduced manual attendance tracking effort by 70% through automated identification

Blood Bank Management API

Backend Development

Python, Flask/Django, SQL

- Developed RESTful APIs for managing donors, blood inventory, and request workflows
- Implemented role-based authentication and authorization for secure access control
- Optimized database queries, reducing response time by 30% for critical operations

AI Image Caption Generator

Deep Learning

Python, BLIP, Pytorch

- Built an image captioning model using CNN (InceptionV3) and LSTM for sequence generation
- Trained on the Flickr8k dataset (8,000+ images) for feature extraction and caption learning
- Evaluated model performance using BLEU score, achieving competitive caption quality

Tic-Tac-Toe AI Web Application

Web Development

JavaScript, HTML, CSS

- Developed an interactive Tic-Tac-Toe game with AI opponent using game logic algorithms
- Implemented multiple difficulty levels using Minimax-based decision making
- Designed responsive UI to ensure cross-device compatibility and smooth user interaction

TECHNICAL SKILLS

Design Tools: Figma(Auto-layout, Components, Variants, Prototyping, Design Systems)

Programming Languages: Python, javascript, SQL, HTML, CSS, Flutter

Framework: Flask, React,

Tools: Git, Docker,

CERTIFICATIONS

- Web Development using React
- Android Programming using Flutter
- Python Project Development
